Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The stone house is a two-story stone structure built in a rectangular plan. The main section is a three-bay by one-bay structure with a one-story stone addition on the rear. This structure has a side entrance plan with a one-story, one-bay entrance porch. Ornamentation includes a bracket cornice, large wood lintels, and round-arch upper sash in the two-over-two sash windows, and bracket and pendant ornamentation on the porch. This structure is one of several significant stone structures in Sandy Hook.

The property is located on the north side of Sandy Hook Road, approximately .06 mile west of Clark Road in Sandy Hook. The house sits on a slight rise above the road. The main facade faces south.

The two-story structure is constructed of stone laid in a random pattern. The main facade is asymmetrically arranged with a side entrance. The entrance has a two-paneled door, with a window, a two-paned (round-arch pane) transom and large stone lintel. The other bays on the first story and three bays on the second story have two-over-two sash windows with large wood lintels and round-arch upper panes. There is a one-bay, one-story entrance porch with chanfered posts, pendant ornamentation and a stick railing. The structure has a bracket cornice and a gable roof covered in wood shingles. Interior-end brick chimneys rise from each gable end of the structure.
